

Your business cannot afford disruptions. And your customers cannot afford your business security to be affected.

Manage Threats - Our SonicWall firewall includes **LiveProtect Services** which include AntiVirus, AntiSpyware, Intrusion Prevention, Content Filtering and SonicWall updates, enabling our threat management appliance to provide superior all-in-one protection against viruses, spyware, worms, Trojans.

Stop Improper Web Surfing - LiveProtect Content Filtering stops this before it begins! We can program this service to block your employees from damaging your POS system, accidentally or on purpose. Filter unacceptable or illegal online content and restrict employees from using your business system for recreational web-surfing. Implement business security measures with our comprehensive single installation.

Protect Against Hackers - As larger companies tighten security, it's the small operator that is easy prey. Viruses, worms and Trojans pose costly security threats, and now the Payment Card Industry (PCI) has mandated compliancy requirements to insure merchants prevent credit breaches.

Eliminate Exposure at a Low-Cost - High-end solutions are not affordable, and low-end routers do not provide protection from these threats. Don't put your business on the line by using a router made for home use! Our integrated, easy-to-use, low-cost solution provides business-class firewall security and programmable services, at a price that any small businesses can afford.

SonicWall purchase includes the compact unit with an Ethernet WAN port and 4-port LAN switch to connect multiple devices safely to your POS network, and first year **LiveProtect Services**. Subscription services are automatically renewed with your Support Plan renewal.

Trust your business only to LiveProtect Services & SonicWall!

Do you know a POS vendor that provides this?
