## ***SonicWALL Protection Kit***

**Protect *YOU and YOUR CUSTOMER'S DATA* while addressing  
some of your PCI Security Requirements**

### **Our *Dell-SonicWALL Protection Kit* includes:**

1. ***LiveProtect Services INCLUDED with our Dell-SonicWALL firewall*** - Our Dell-SonicWALL firewall includes ***LiveProtect Services*** which include AntiVirus, AntiSpyware, Intrusion Prevention, Content Filtering and SonicWALL updates, enabling our threat management appliance to provide superior all-in-one protection against viruses, spyware, worms, and Trojans. The compact unit contains an Ethernet WAN port & 4-port LAN switch, to connect multiple devices safely to your POS network.
2. ***LiveAntiVirus Services for your POS Server*** - AntiVirus & AntiSpyware subscription services and updates at the desktop level of your POS Server, for the first year.
3. ***LiveAlert&Connect Services*** - Our internet-based, hosted monitoring and remote access service for your store. ***LiveAlert&Connect*** reduces your costs, improves your confidence and avoids service interruptions, by proactively alerting your support team before problems disrupt your business operations. ***LiveAlert&Connect*** provides instant remote access without compromising PCI Security requirements, to allow us to repair your problems instantly. ***LiveAlert&Connect*** has been security assessed by Trustwave as **meeting PCI-DSS requirements**.

### **Why a *SonicWALL Protection Kit*?**

1. *Small Business is more susceptible to attacks. Large companies have tightened their security, so it's the small business operator that is now the easy prey.*
2. *Low-end Routers do not provide any firewall protection, and a low-end firewall is inadequate for a business. Don't allow your business to purchase a unit made for home use!*
3. *There are inherent security problems in using pcAnywhere (or other Remote products) today and you need a secure method for us to access your store to solve problems remotely and quickly.*

01.27.16

4. Viruses, worms and Trojans always pose a costly security threat.
5. The Payment Card Industry (PCI) has mandated Payment Application Data Security Standards (PA-DSS) requirements to you, the Merchant, for preventing credit card data breaches.
6. Everyone wants great service. Catch a problem before it causes a bigger one.
7. Restrict your employees from improper web surfing.

**SonicWALL Protection Kit** includes first year licensing subscription services and host connection, and are automatically renewed with your Support Plan renewal.

**Do you know a POS vendor that provides all this?**
