

## Effortlessly Manage Your Restaurant

Easy to set up and easy to use, our goal is to help you run a successful restaurant while providing an amazing customer experience on innovative technology.

### Access Your Data Anywhere, Any Time

Toast automatically tracks your menu sales, inventory, and labor, and organizes that information into detailed reports you can access from any internet-connected device, any time.

### Improve Table Turn Times

With POS tablets, servers can fire orders immediately, streamlining the ordering experience and improving throughput by over 15%.

### Don't Forget About The Kitchen

Customize your entire kitchen workflow and keep chefs organized with an intuitive KDS. Simply press a button to alert servers when an item is ready; voila, communication is no longer one-sided.

“ Toast is the best investment I’ve ever made. I’ve saved thousands of dollars on food costs by being able to track my inventory better and removing the menu items that are a drag on my bottom line. The fact that I can update my menu in Toast and it automatically updates my online ordering has probably saved me five to six hours a week.”

- Matt Stanfield, Mattenga's Pizzeria

## A Team Ready to Help You Grow

Toast is built for restaurants. Our features and software upgrades are prioritized around what will make you successful and what you need. We're here to help you be successful.

### A POS With Integrated Tools That Turn Customers Into Regulars

With mobile-friendly and physical gift cards, an easy opt-in loyalty program tied directly to your customer's credit cards, and online ordering seamlessly synced to your operations, it's never been easier to grow your customer relationships and revenue.

### A 24/7 Support Team Ready to Take Your Call

We have a team of real people ready to make your customer experience as smooth as possible. They'll help build your menu, train your team, or answer any questions you have (24/7 of course).

“Because Toast is cloud-based, we have the ability to push updates and manage our data remotely. We can integrate into other systems and host online ordering, gift cards, and loyalty on one platform.”

- Eric Kinniburgh, COO, Bare Burger
